Non Medical Science  
CGPA - 88

---

## Skills

- Cpp+Dsa
- Html and css
- Javascript
- Basic python
- Basic git and github
- Backend: MongoDB Express Nodejs

---

## Projects

- Authentication and Authorization**  
Created a backend project using nodejs, expressjs, mongodb which helps the users to signup, signin, logout, and many other functionalities. Users can also reset their password if they forget password in any case. Concept of Json web token has also been used. Here is the link for the source code:  
<https://github.com/manveer600/expressProjectForAuthentication>
- A basic website template which is purely built in bootstrap.**  
This is the basic website iCoder which is purely built in bootstrap. The link for the source code and website is here:  
<https://github.com/manveer600/iCoder>  
<https://manveer600.github.io/iCoder/>
- Blogging Website**  
Made a minor backend project using express and mongoose of a blogging website, which features to create a blog 📝, create a comment on a blog, deleting the comment, liking and unliking a blog. From basic routers to controllers and mongoose models everything is handled. The source code for the same is give in below repo:  
<https://github.com/manveer600/bloggingWebsiteBackend.git>

---

## Languages

- English
- Hindi
- Punjabi

---
